

PASSENGER TRAFFIC REPORT

ADELAIDE AIRPORT LIMITED

ADELAIDE AIRPORT HAS RECORDED THE FOLLOWING AERONAUTICAL TRAFFIC PERFORMANCE FOR THE THREE MONTHS ENDED SEPTEMBER 2011

Pax ('000)	Financial Year to Date		
	Sept-11	Sept-10	Growth(%)
Domestic	1,475	1,601	-7.8%
International	156	138	12.7%
Regional	148	145	2.5%
TOTAL	1,780	1,884	-5.5%

Total passengers declined by 5.5% on prior year in what has been a difficult period for the aviation sector, with the grounding by CASA of Tiger's fleet being compounded with various industrial actions and ongoing economic challenges.

Pleasingly, the international market continues to perform strongly (+12.7%), with capacity additions by Malaysia Airlines and Pacific Blue both contributing to the result, particularly in the

context of the high Australian dollar being an incentive for Australians to travel overseas. Regional growth at 2.5% is solid.

Domestic market comparisons against prior year are dominated by the withdrawal of Tiger, who have yet to return to the Adelaide market.
