

The value placed upon sustainability helps our business respond to, and get ahead of, the complex social, environmental, market, and technological influences that we operate within. Sustainability is at the core of Adelaide Airport's Vision and Strategic Plan.

Adelaide Airport's vision is to be a top tier Airport Business in Asia Pacific, recognised for delivering exceptional outcomes to our customers, partners, shareholders and community. Our vision can be achieved with the benefit of strong governance, innovation and the delivery of responsible growth and sustainable long-term shareholder value. We seek to integrate current and future environmental and social risks and opportunities with our short-term financial objectives.

Our Sustainability Commitment

We strive for sustainability excellence as a global airports sector leader in sustainability and our people are committed to building this policy into our day-to-day business. We will review and report on our sustainability progress annually.

Our Sustainability Objectives

- Seek to ensure the safety and security of airport users, employees, data and systems
- Engage the community through a partnership approach, creating community value and connectivity
- Act with integrity and ethics, to build and maintain trust with all our stakeholders
- Operate in a fair and inclusive manner, expanding employee diversity and providing a flexible workplace
- Deliver responsible and sustainable growth, financial resilience and economic viability
- Be an employer of choice to attract and retain the right people and build high staff engagement
- Continuously improve our facilities, services and practices to be supportive of future passenger growth
- Understand and mitigate financial and physical climate risks, through active management of our carbon emissions and maintenance of resilient assets and communities
- Embrace innovation as central to operational efficiency, customer service and value chain creation
- Integrate sustainability principles into planning, design, construction, procurement and technology deployment, driving adoption through our supply chain
- Measure and manage energy use, seeking opportunities to source cleaner and cost effective alternatives
- Conserve water, improve efficiency and maximise opportunities for reuse and recycling
- Minimise pollution and waste from our operations, finding opportunities to recover, reuse and recycle waste
- Support and educate a diverse, inclusive and responsible supply chain, ensuring compliance with human rights regulations, innovative solutions and sustainable sourcing practices
